SUMMARY

A fourth-semester student at Bina Sarana Informatika University with expertise in web development, I am proficient in HTML, CSS, JavaScript, object-oriented PHP, and the CodeIgniter framework. I have successfully completed various web development projects utilizing these skill sets. I am continuously keeping up with industry advancements and updating my skills through online learning platforms such as Skilvul and Dicoding.

EDUCATION

BINA SARANA INFORMATIKA UNIVERSITY - D3   2021 - 2024 (estimate)

Information System

- I have conducted research and development for a village profile website and a Direct Cash Assistance (BLT) management system using the CodeIgniter framework. The process involved data collection, needs analysis, website development, as well as system testing and implementation.
- I have studied and implemented the CodeIgniter framework in web development. I have a good understanding of the Model-View-Controller (MVC) concept and am capable of separating business logic, presentation, and data processing using CodeIgniter.

SMK NEGERI 1 TIRTAJAYA   2017 - 2020

Sofftware Engineering

- I have learned the fundamentals of PHP programming language and how to use XAMPP.
- I have studied java programming languange and the NetBeans IDE for desktop application development.
